SIM1
SOUND IMPRINTING

XT - 1
ONE PEDAL - INFINITE GUITARS

- Visit the website www.sim-one.it to get the last updated version of the software in the DOWNLOAD section;

- In System Preference Section of your MAC, make sure to tick "Mac App Store and identified developers"

- Click on the file (for example "GuitarEditor_1.0.dmg") and start the installation procedure;

- Drag the "Guitar Editor" icon on the desktop in the App folder.

- Now you can open the program XT-1 Configuration Manager

2
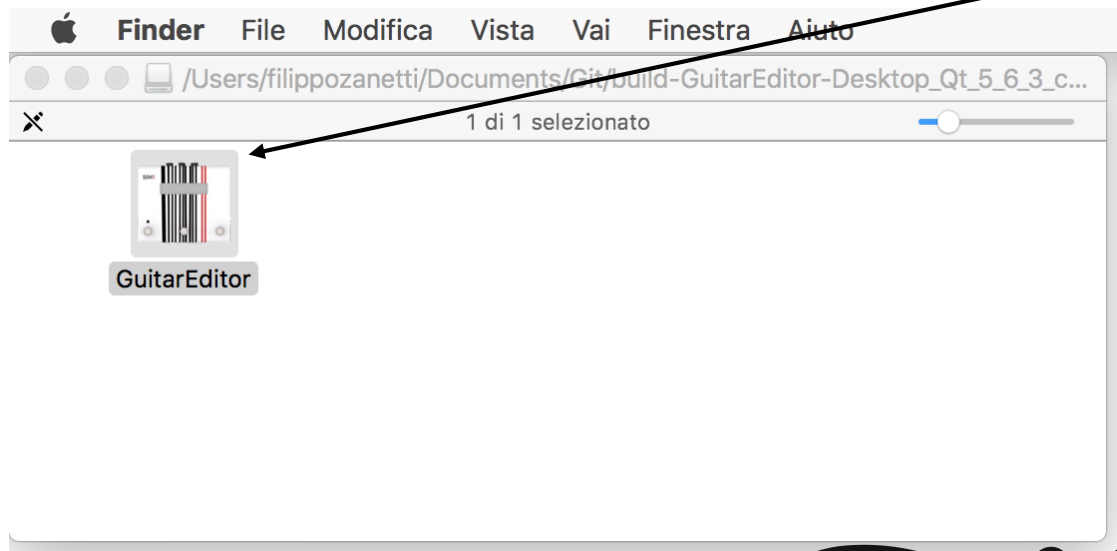

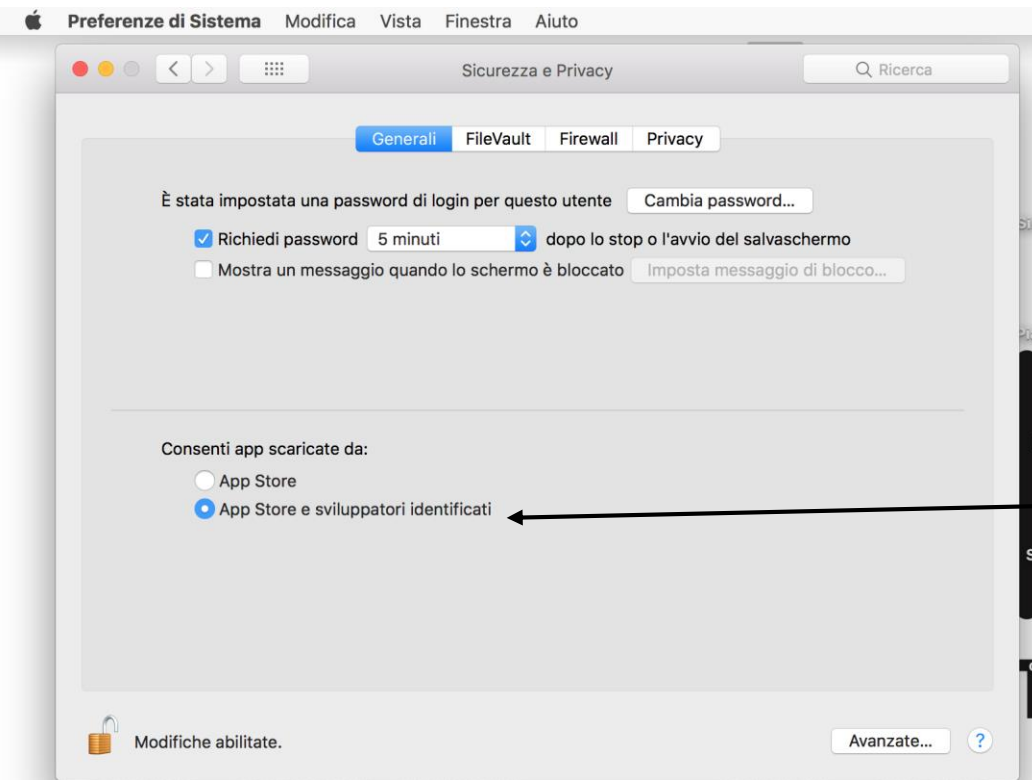

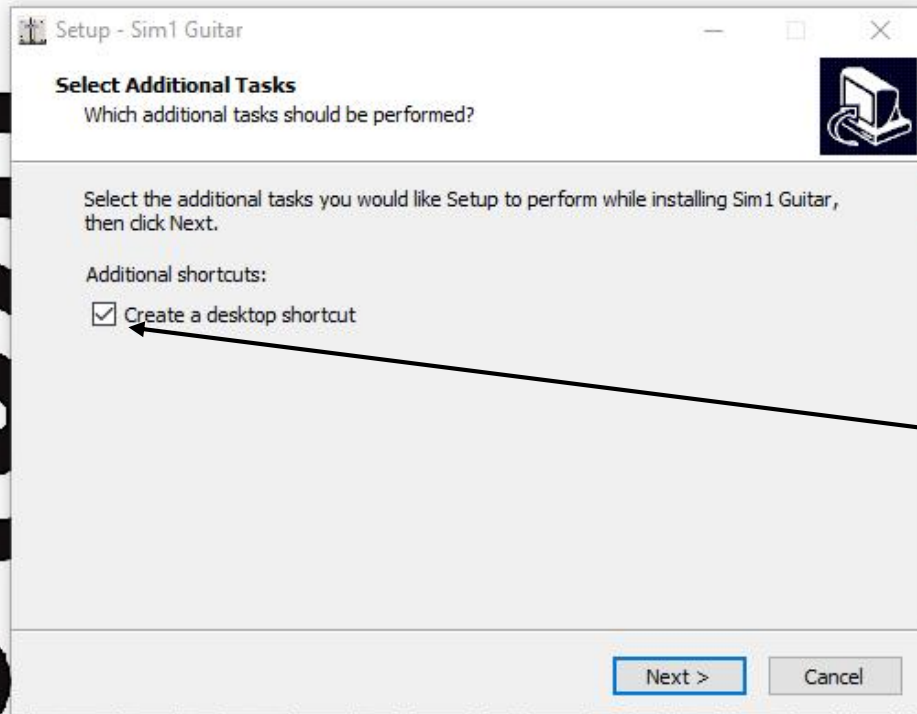

- Visit www.sim-one.it to download latest sw version;

- Click on the file "Xt1_Editor_setup" and start the installation procedure;

- Make sure to flag this box in order to have the Software Icon on your desktop, once the installation is finished;

- Click on the "Install" button. The software will be installed in few seconds and the icon will appear on your desktop;

- Now you can open the XT-1 Configuration Manager.

3
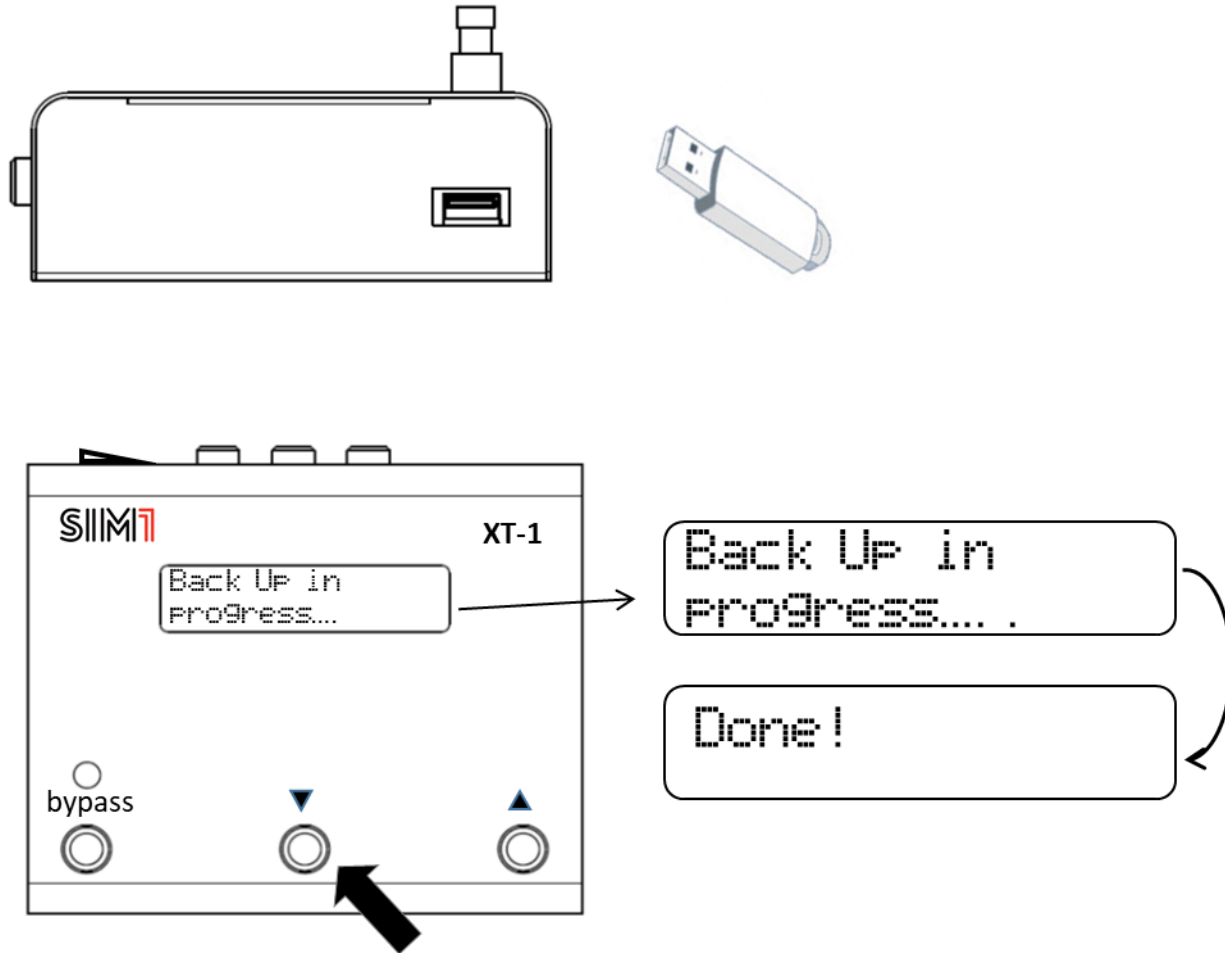

- Insert the USB key in the USB port, then hold the Down Switch for 3 seconds

- "Back Up in progress" will appear on the display, Leave the USB Key inserted into the unit until all the data will be loaded to the stick, and till "Done!" will appear on the display.

- Now you can remove the USB stick and insert it into the PC/MAC to edit your XT-1 configuration with XT-1 Configurator Manager

Back Up in progress.... .

Done!

Temporary Demo Sounds to Download

Neck Pickup Sound
Mid Position Pickup Sound
Bridge Pickup Sound

Step 3 (Optional)
Test the DEMO sounds for free
from SIM1's SOUND STORE

- After the creation of your account on the website https://store.sim-one.it/ browse the guitar library and click on the guitar you wish to test.

- Click on each of the links located below the title «Temporary Demo Sound to Download»», and save the related files in the upper level of an USB key.

- Insert the key in XT-1, wait few seconds, then hold the "UP" switch for 5 seconds.

- The function DEMO MODE will start and you will have the opportunity to test for 5 minutes the guitars previously saved into the USB key. NB: During the DEMO MODE the related Source Guitar in use will be the last used.

- In case you want to stop the DEMO MODE before its 5 minutes duration, hold the "DOWN" switch for 5 seconds.

SIM1   XT-1

DEMO MODE

▼   ▲

NB: Before the download of a DEMO file, it is recommended to setup your browser non to automatically open the file at the end of the download.

Save your new configuration
and upload it on your XT-1

- When you are satisfied of your own new configuration, Save it and Exit.
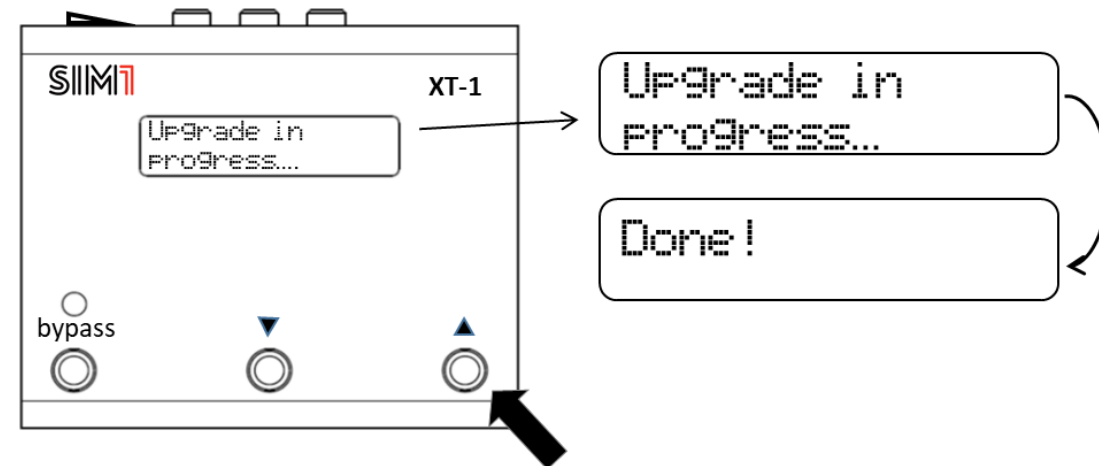

- Insert the USB key into the XT-1 device. Hold for 3 seconds the UP Switch.

- On the display will appear "Upgrade…". Leave the USB Pendrive inserted into the until the "Computing process" is finished and "Done!" will appear on the display.

NB: It's possible to rename the file "xt1.arc" and save different configurations. Just make sure to have only one backup file in the USB pendrive when you wish to transfer it to the pedal.
